INTRODUCTION

Executive Summary

Each year since the 2022 season, the National Football League Players' Association (NFLPA) has surveyed players across the league about their daily experiences at team facilities, scoring clubs across a variety of categories, from dining and locker rooms to strength staff & ownership. Traditionally, these results have appeared as a dense grid of letter grades. This makes it difficult to immediately spot a team's strongest and weakest areas without drilling into individual reports.

This project reimagines the presentation. Using Python to clean and restructure the NFLPA's report card data and Power BI to visualize it, the results can be applied to any of the past three seasons. For this report, the focus is on the 2024 season – the most recent set of results – because it reflects the largest number of players who are still actively playing in the league today and as such, offers the most relevant insights with the 2025 NFL season starting soon.

Highlights from the 2024 Season

- High Performers:
 - Miami Dolphins, Minnesota Vikings, & Atlanta Falcons
 - These teams coupled world-class facilities with attentive ownership & strong coaching support
- Most Improved
 - Los Angeles Chargers, Atlanta Falcons, & Washington Commanders
 - These teams upgraded either their facilities or leadership structures (or both), which led to dramatic year-over-year jumps.
- Decliners
 - Philadelphia Eagles, Jacksonville Jaguars, & New York Jets
 - These teams fell in the rankings due to factors such as overcrowded facilities, perceived poor coaching &/or leadership, and cuts to amenities.
- Common themes include wide gaps in family support & ownership investment, while strength staff & locker rooms are generally well regarded across the league.

How To Read This Report

Seasons vs. Publication Years

- The NFLPA publishes its report cards after each season.
- This report focuses on the 2025 NFLPA Report Card, reflecting on the 2024-25 NFL season.
- Previous editions covered the 2023-24 (published 2024) and 2022-23 (published 2023) seasons, but those are not analyzed here.

Categories Scored:

1. Treatment of Families
2. Dining Area
3. Diet & Nutrition Staff
4. Weight Room
5. Strength Staff
6. Training Room
7. Training Staff
8. Locker Room
9. Team Travel
10. Head Coach Rating
11. Ownership Rating

How To Read This Report, cont.

Scoring Method

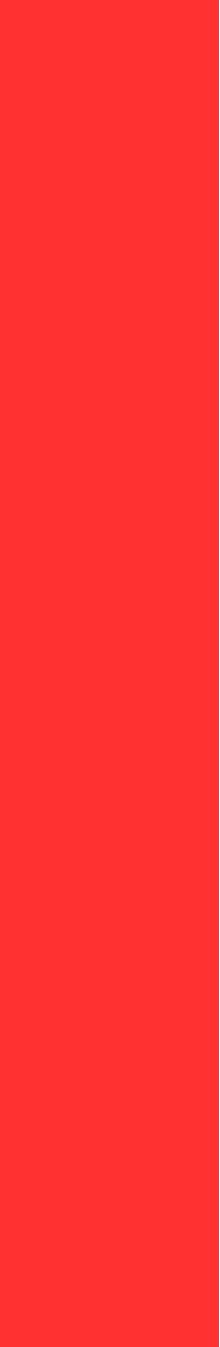

- Letter grades mapped to a 0-5 scale ($A+ = 4.3$, $A = 4.0$, $A- = 3.7$, ... $F = 0.0$).
- This GPA-style scale was chosen after testing a 0-5 version, which spaced scores out too widely and reduced the ability to compare teams closely.
- A team's Average Score is the mean of all available category scores.
- Categories marked "N/A" are excluded from the average.

Why this format is different

- The original NFLPA pages show a grid of letter grades which require clicks to see further context for the grades.
- This report prioritizes clarity: per-team profiles highlight the top and bottom categories, alongside league and category overviews for comparison.

Visual Key

- : **Green Circle** = Above the league average
- : **Orange triangle** = Around the league average
- : **Red diamond** = Below the league average
- Box plots & bars show range of scores for each team/category

METHODOLOGY

Data Preparation and Transformation

Objective:

- To convert raw NFLPA survey data into a structured, numerical format ready for analysis and dashboard visualization.

Workflow Summary:

Part 1: Wide Format Cleaning

1. Importing and Reading Data

- Loaded the data as a pandas data frame to extract the results.

2. Column Cleanup and Standardization

- Stripped spaces, standardized case, replaced special characters with underscores.
- Renamed verbose columns for clarity (e.g., `nutrition_nutritionist_dietician` → `diet_nutrition_staff`).

3. Mapping Grades to Numeric Scores

- Applied a GPA-style grading scale ($A+ = 4.3$, $F = 0.0$) to convert letter grades into numeric values.

4. Creating Numeric Score Columns

- Applied the grade-to-score mapping to all rating categories (families, dining, weight room, etc.).

5. Availability and Completeness Flags

- Added boolean flags to indicate if each score was present.
- Counted total available ratings per team.

Data Preparation and Transformation, cont.

1. Calculating Overall Averages and Survey Version

- Computed each team's average score across available categories.
- Tagged each row as 2022 Base or 2023+ Expanded format.

2. Grade String Cleanup

- Standardized text grades (uppercase, stripped whitespace, replaced NaN values).

3. Exporting Cleaned Dataset

- Output to cleaned_nflpa_survey.csv for use in Power BI dashboards.

Data Preparation and Transformation, cont.

Part 2: Long Format Transformation

1. Melt Operation

- Used pd.melt() with year and team_name as ID variables.

2. Score Category Column Creation

- Created a single score_category column containing the name of the category (e.g., Locker Room, Team Travel, Average).

3. Score Value Column Creation

- Created a single score_value column containing the numeric score (0.0 to 4.3).

4. Category Name Cleanup

- Formatted category names for readability:
 - Removed “_score” suffix.
 - Replaced underscores with spaces.
 - Applied title case.

5. Output Columns:

- year – Survey year (e.g., 2022, 2023, 2024)
- team_name – NFL team name
- score_category – Cleaned category name
- score_value – Numeric score (0.0 to 4.3)

6. Exporting Long Dataset

- Saved the transformed dataset for use in Power BI dashboards and visualizations.

Data Modeling and Visualization Workflow

Objective:

- Transform NFLPA letter-grade report cards into an interactive dashboard to compare teams, track YoY change, surface strengths/weaknesses, and drill into per-team insights

Data Source and Prep

- Source: NFLPA team survey (multi-year).
- Input shape: Long format from Python with columns: Team, Category, Score, Year.
- Scores are GPA-style (0.0–4.3).
- Cleaned files imported into Power BI.

Data Model

- Tables: SurveyLong (Team, Category, Score, Year), Teams, Categories, optional TeamLogos.
- Relationships: SurveyLong[Team]→Teams[Team], SurveyLong[Category]→Categories[Category].
- Report filters: Year slicer; optional Team slicer.

Key Measures (examples)

- Category & Team Scores
- Rankings
- Highest/Lowest Category per Team (handles ties)
- YoY Change

Data Modeling and Visualization Workflow, cont.

Visuals

- Cards: Team, Team Avg Score, Overall Rank ("Rank X of Y").
- Multi-row card: Highest / Lowest Category (comma-separated if tied).
- Bar chart: Category scores; conditional formatting for above / near / below league average.
- (Optional) Box/whisker or dot plot for league distribution by category.
- Logo image bound via TeamLogos[LogoURL] (Modeling → Data category: Image URL).
- Category Comparison
- League average vs. selected team(s).
- Icons (●, ▲, ◆) for quick above/around/below-average cues.

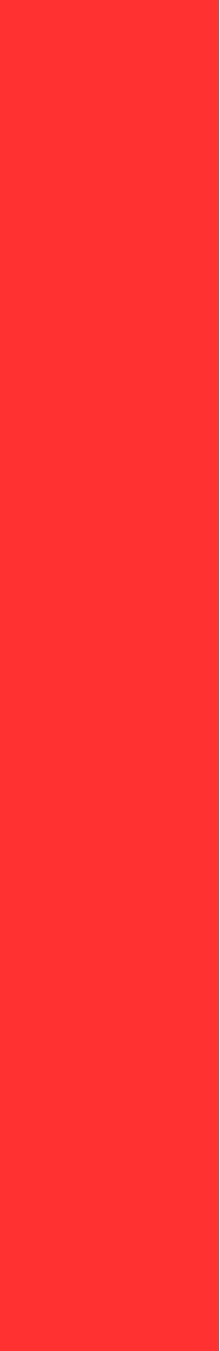

Theming & UX

- Apply team colors where possible; remove unnecessary gridlines/borders.
- Keep text styles consistent; use short labels and readable scales.
- Use tooltip pages for definitions/notes (optional).

Data Modeling and Visualization Workflow, cont.

Logic Highlights/Gotchas

- Use SELECTEDVALUE for Team/Year context; avoid “single value cannot be determined” by referencing measures, not columns, inside visuals.
- Handle ties with CONCATENATEX.
- For multi-team comparisons, wrap measures with ISFILTERED/ HASONEVALUE to control visual states.

LEAGUE OVERVIEW

League Overview

Average Category Scores (League-wide) (0-4.3 scale)

- Strength Staff
 - This category had the highest average, with most teams praising their strength coaches.
- Locker Room
 - This category had high marks across the league, with the top teams investing in upgrades.
- Head Coach Rating
 - This category had generally strong marks, with some teams earning perfect scores, which reflect positive player-coach relationships.
- Treatment of Families:
 - This category had a wide range of scores. Some clubs offer excellent family support, while other clubs lag behind.
- Ownership Rating:
 - This category had the lowest average score. Several teams criticize their owners for a lack of investment.

League Overview, cont.

Distribution & Trends

- Strength Staff & Locker Rooms
 - These categories had a narrow score range, with most teams rating them well.
- Ownership & Family Support
 - These categories had a wide variance, which reflects differing priorities.
- Facilities vs. Communication
 - Better scores with categories correlate with investment & open dialogue, whereas budget cuts & ignored feedback lead to declines.

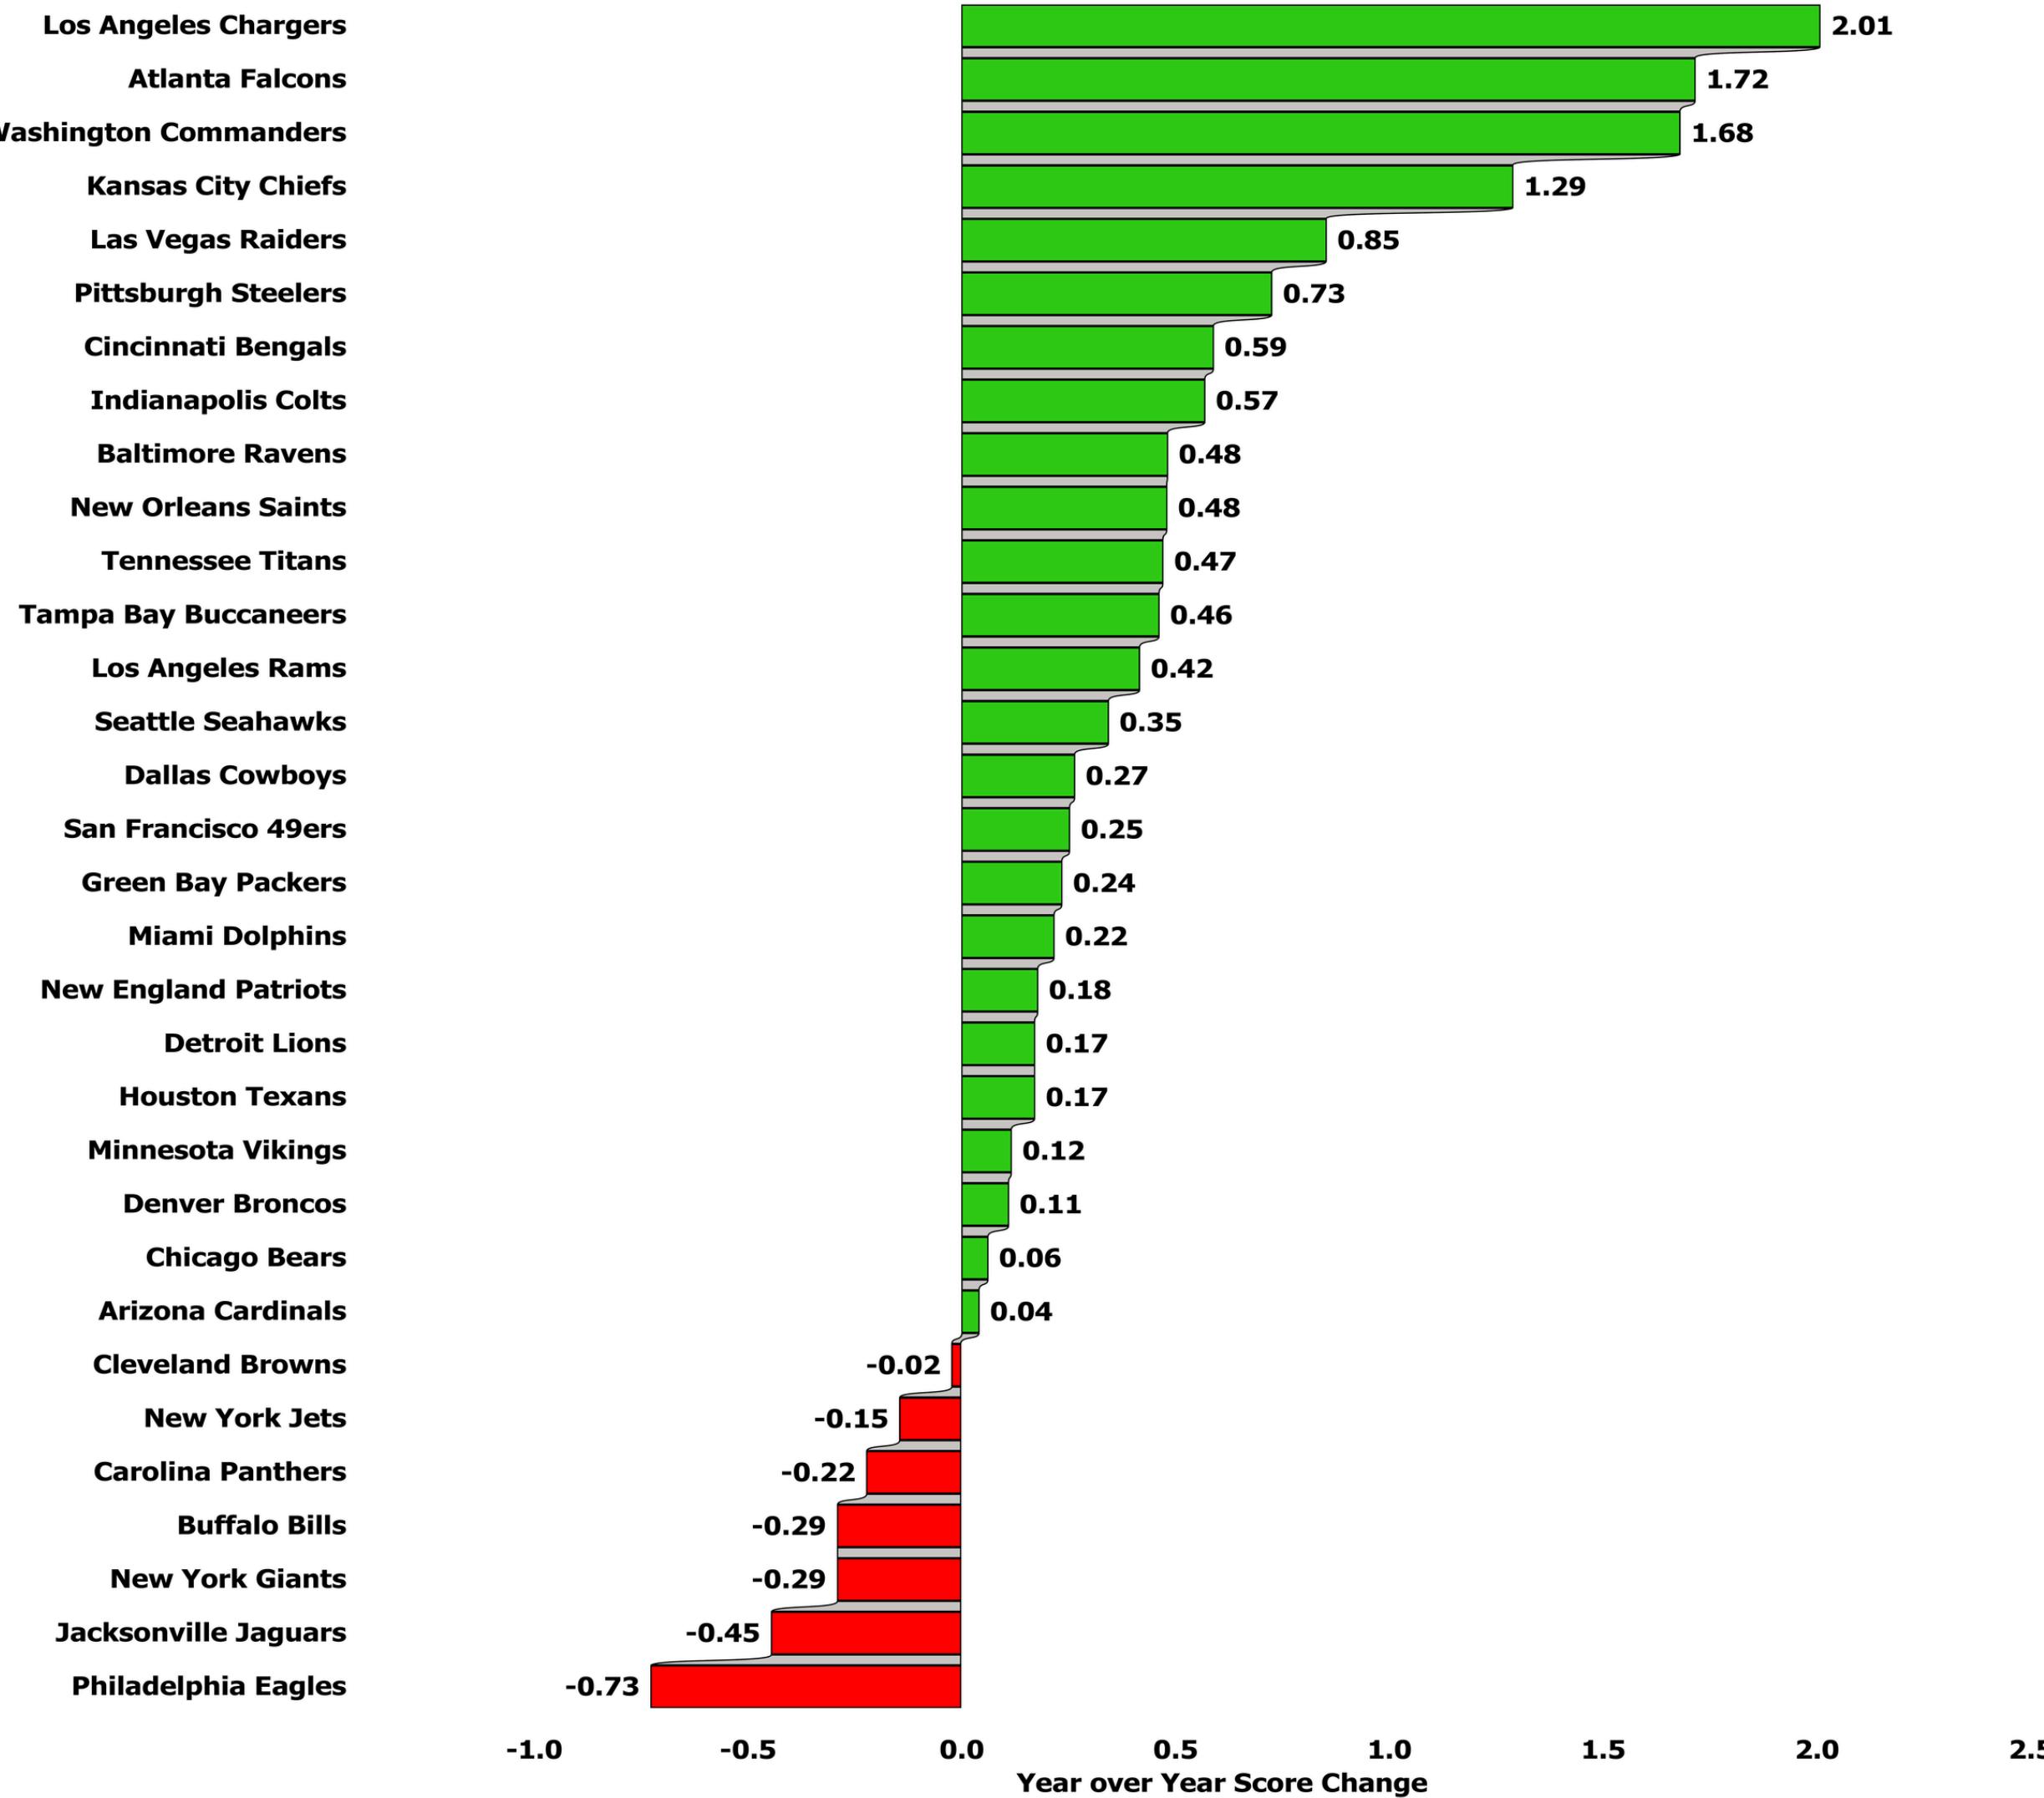

Top Performers

Rank	Team & Avg. Score	Highlights
1	Miami Dolphins – 4.22	State-of-the-art facilities, strong support staff, top travel experience.
2	Minnesota Vikings – 3.96	“World-class” facilities, highly rated coaches, personalized strength programs.
3	Atlanta Falcons – 3.93	Facility upgrades and cultural change under Raheem Morris.
4	Green Bay Packers – 3.88	Strong locker room, strength staff, and family support.
5	Los Angeles Chargers – 3.86	New complex improved all categories; travel remains a concern.

Bottom Performers

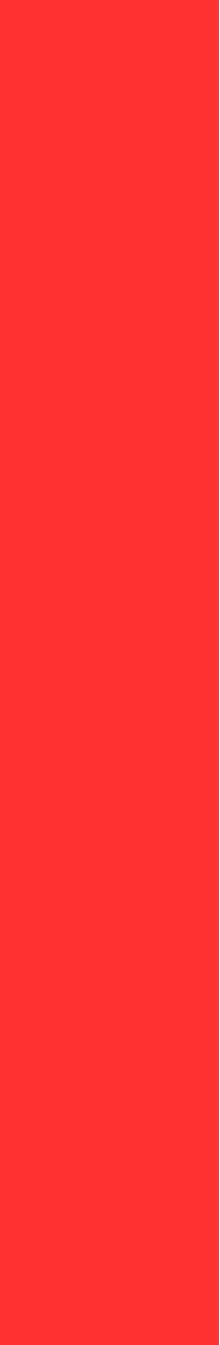

Rank	Team & Avg. Score	Highlights
32	Arizona Cardinals – 1.77	Small, outdated facilities and low ownership rating despite some recent upgrades.
31	New England Patriots – 2.03	Upgraded facilities, but space limitations and travel quality hold them back.
30	Cleveland Browns – 1.94	Strong weight room, but locker room and family support lag behind.
29	New York Jets – 2.05	Lowest ownership rating in the league and reduced food quality.
28	Pittsburgh Steelers – 2.3	Below-average ownership and training resources compared to peers.

Year-over-Year Score Change

Year-over-Year Changes (2024 vs. 2023)

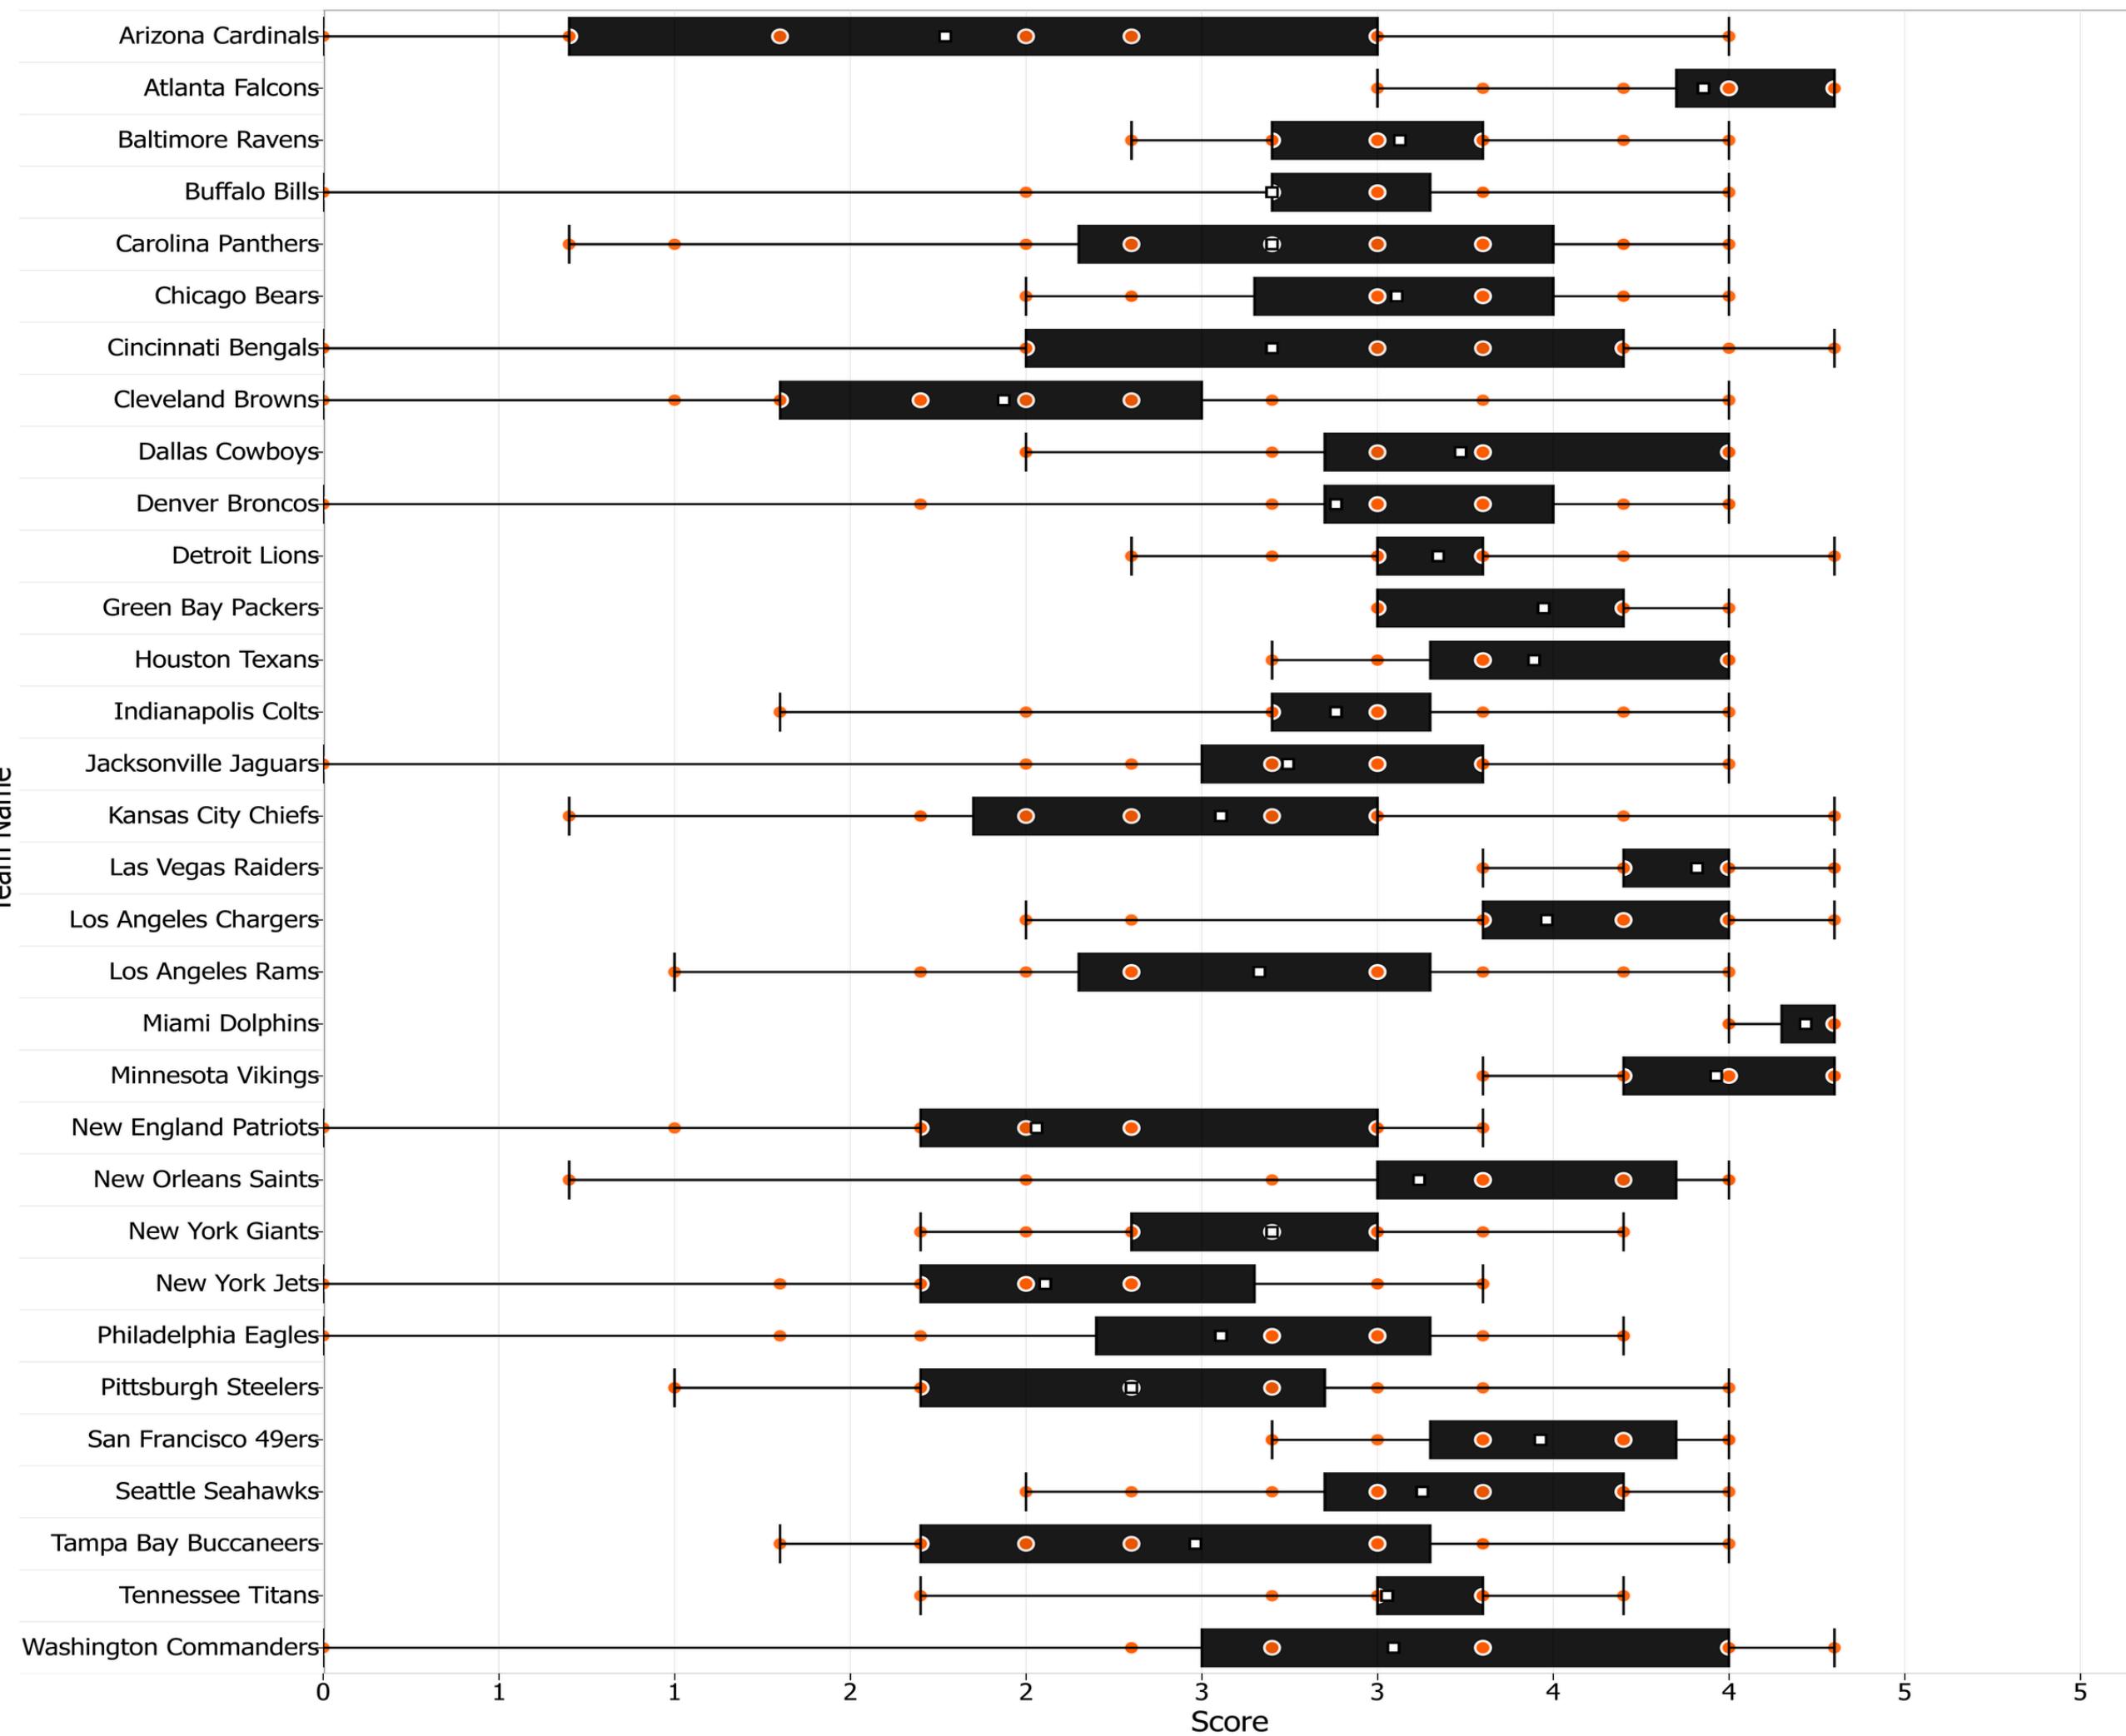

Change	Team	Explanation
+2.01	Los Angeles Chargers	New state-of-the-art facility improved every category.
+1.72	Atlanta Falcons	Renovations and coaching change boosted scores.
+1.68	Washington Commanders	Coaching change, better food, family services.
-0.73	Philadelphia Eagles	Lack of childcare, travel and space issues.
-0.45	Jacksonville Jaguars	Coaching change needed to address culture.
-0.29	New York Jets	Cuts to food program, loss of dietitian, leadership issues.

CATEGORY OVERVIEW

Category Overview

2022 2023 2024

Category Leaders

Category	Top Score	Leading Team(s)	Highlights
Treatment of Families	4.3	• Vikings	<ul style="list-style-type: none">Strong family accommodations and support services.
Dining Areas	4.3	• Dolphins	<ul style="list-style-type: none">High-quality food and well-maintained dining facilities.
Diet & Nutrition Staff	4.3	• Raiders • Dolphins	<ul style="list-style-type: none">Accessible staff with tailored nutrition programs.
Weight Room	4.3	• Falcons • Raiders • Chargers • Dolphins	<ul style="list-style-type: none">Modern, spacious training spaces

Category Leaders, cont.

Category	Top Score	Leading Team(s)	Highlights
Strength Coaches	4.3	<ul style="list-style-type: none">Dolphins	<ul style="list-style-type: none">Trusted coaches with strong player relationships.
Training Room	4.0	<ul style="list-style-type: none">RaidersDolphins	<ul style="list-style-type: none">Well-equipped facilities for treatment and recovery.
Training Staff	4.0	<ul style="list-style-type: none">DolphinsVikings	<ul style="list-style-type: none">Professional, attentive care for players.
Locker Room	4.3	<ul style="list-style-type: none">FalconsBengalsDolphinsVikings	<ul style="list-style-type: none">Renovated, spacious, and player-friendly.

Category Leaders, cont.

Category	Top Score	Leading Team(s)	Highlights
Team Travel	4.3	<ul style="list-style-type: none">Dolphins	<ul style="list-style-type: none">Comfortable, efficient travel arrangements.
Head Coach Rating	4.3	<ul style="list-style-type: none">LionsDolphinsFalconsVikingsChiefsCommanders	<ul style="list-style-type: none">Highly rated for leadership and communication.
Ownership Rating	4.3	<ul style="list-style-type: none">FalconsDolphinsVikings	<ul style="list-style-type: none">Strong commitment to investment and team culture.

Example-Driven Common Themes

- Family Support
 - The Washington Commanders improved from an F to a B+ by adding amenities such as a family room, on-site daycare & regular family events.
 - The Jacksonville Jaguars & Carolina Panthers remain near the bottom of the league, due to limited accommodations.
 - The Tampa Bay Buccaneers ended daycare fees, which slightly boosted scores, but the club still suffers from poor food & locker-room conditions.
- Ownership Investment
 - Minnesota Vikings ownership is praised for consistent investment in facilities and culture.
 - In contrast, New York Jets owner Woody Johnson cut the food budget and lost a valued dietitian, which led to a rating drop from B- to F.
- Strength Staff & Locker Rooms
 - The Miami Dolphins, Vikings and Atlanta Falcons receive praise for both modern facilities & exceptional staff.
 - Players describe Miami's space as "state-of-the-art", & Minnesota's as "world-class."

Example-Driven Common Themes, cont.

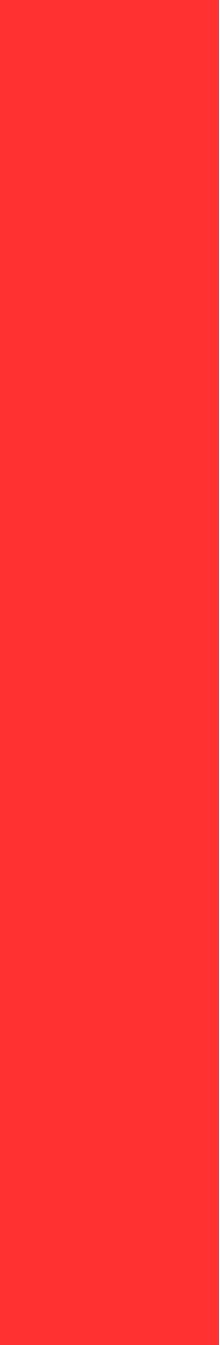

- Travel Logistics
 - The Los Angeles Chargers have upgraded their facilities, but they haven't yet addressed fixed travel inefficiencies.
 - The New England Patriots' travel quality is outdated, with only 9 % of players feeling comfortable on flights.
 - Carolina downgraded travel from first-class to coach which prompted dissatisfaction from players.

Consistency Leaders

Team	Highlights
Miami Dolphins	Above league average in all categories, combining elite facilities with strong leadership.
Minnesota Vikings	Consistently high scores across facilities, staff, and culture.
Atlanta Falcons	Significant improvements under new leadership and upgraded facilities.
Las Vegas Raiders	Balanced excellence in training, nutrition, and modern infrastructure.

Insights

- Player satisfaction hinges on both people (coaching, support staff, culture) and places (facilities, travel).
- Teams that invested in both infrastructure and communication—like Miami, Minnesota, & Atlanta—achieved the highest marks.
- Clubs that ignored feedback, cut budgets, or failed to upgrade their facilities risk facing a steep declines in player ratings.

CONCLUSION

Conclusion

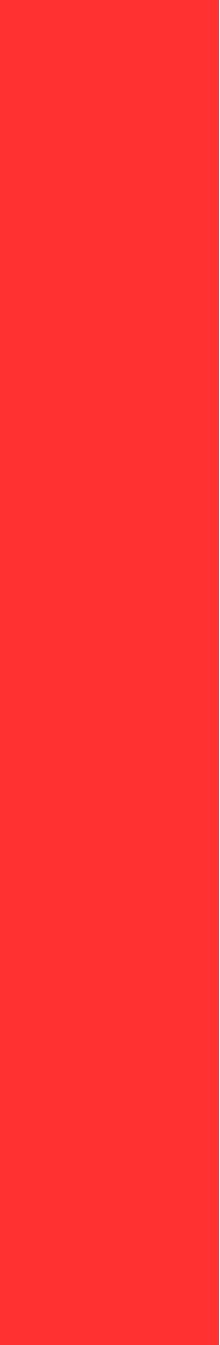

The 2024 NFLPA Report Card analysis highlights how infrastructure investment, supportive leadership, and responsive culture directly influence player satisfaction. Top-performing teams like the Miami Dolphins, Minnesota Vikings, and Atlanta Falcons demonstrated consistent excellence across facilities, staffing, and travel – while others declined due to budget cuts, overcrowding, or stagnant leadership.

From a technical standpoint, this project showcases the power of combining Python for data preparation with Power BI for interactive storytelling:

- Python enabled robust cleaning, transformation, and scoring logic to standardize multi-year, multi-format survey data.
- Power BI transformed this processed dataset into a fully interactive dashboard, enabling rapid exploration of team and category performance, year-over-year trends, and league-wide comparisons.

By merging rigorous data processing with intuitive visualization, this workflow not only surfaces insights that might be buried in static reports, but also makes them accessible for decision-makers, analysts, and fans alike.

The approach is adaptable beyond the NFL – any organization with structured performance metrics can apply similar methods to identify strengths, diagnose weaknesses, and track progress over time.
